

The Texas Nursery & Landscape Association Foundation established a scholarship program for students interested in the field of Horticulture.

If you are a deserving student interested in this field of study, please go to the following website for more details:
<https://tnla.awardsplatform.com/>.

The **DEADLINE** for completing on-line applications for the **2022-2023** school year is **December 15, 2021**. Only electronic applications using the website above will be accepted.

All scholarship applicants should carefully review the program requirements as explained on the website, and then submit their application, letters of referral and transcripts by the deadline. The Foundation Trustees have stressed the importance of having good personal references accompany the scholarship application form -- many times it is the personal references that help the Trustees decide between two deserving students.

We appreciate your support and promotion of this worthwhile program. If you are interested in finding out more, please visit our website tnlaonline.org or contact Cheryl Staritz at (512) 579-3863 or cheryl@tnlaonline.org.
